

COMPANY OVERVIEW

Equipment and Service for the Oil & Gas, Marine, Power Generation, Construction, Transportation, Material Handling, Government, Mining and Agricultural Markets

QUALITY PRODUCTS & SERVICE

SINCE 1902

Stewart & Stevenson, founded in Houston, Texas in 1902, is a manufacturer and distributor of products and services for the oil and gas, marine, construction, power generation, transportation, material handling, mining and agricultural industries. We serve domestic and global markets with equipment, rental units, and parts and service from 65 US and international locations.

MANUFACTURED EQUIPMENT

Stewart & Stevenson engineers and manufactures durable equipment that meets world-class standards. Manufacturing operations are located in Houston and Odessa, Texas; Edmond, Oklahoma; Casper, Wyoming, and Calgary, Alberta, Canada. A dedicated remanufacturing center is located in Killeen, Texas.

Well Stimulation & Fracturing Systems

- Fracturing pumps
- Chemical additive units
- Hydration units
- Fracturing blenders
- Acidizing units
- Data acquisition and control centers
- Support units
- Offshore stimulation systems

Cementing Units

- Truck, trailer or skid mounted
- Automatic or manual density controls
- Recirculating or jet mixing systems
- Single or dual pump configurations
- High temperature and cold weather packages

Rig Systems

- Drilling rigs
- Workover and well servicing rigs
- Flushby rapid service rigs
- Masts
- Drawworks
- Support units

Well Intervention & Coiled Tubing Systems

- Trailer and truck mounted coiled tubing units
- Skid mounted space saver coiled tubing units
- Masted coiled tubing units
- Injector heads, reels and trailers
- Fluid pumping equipment
- Nitrogen and industrial gas systems
- Offshore hazardous area units

Power Generation

- Offshore for drilling and hotel power
- Onshore drilling power
- Industrial continuous duty

Drive Systems and Switchgear

- Variable frequency drive systems
- SCR DC drive systems
- Medium voltage switchgear
- Medium voltage soft starter

Specialty Equipment

- Rail King railcar movers
- Customer-branded seismic vehicles

DISTRIBUTED EQUIPMENT

Stewart & Stevenson offers a broad product line from world-class manufacturers, along with aftermarket parts and service, training and rental solutions. Our distributed products serve the oil and gas, marine, material handling, power generation, transportation, construction, mining and agricultural markets.

Products

- Industrial diesel engines and parts from MTU and EMD; diesel and natural gas engines and parts from Deutz for all markets.
- On-highway Detroit engines and parts from Daimler
- Industrial automatic transmissions and parts from Allison for all markets
- Standby, emergency backup, prime and CHP power generation from MTU Onsite Energy
- Generators, compressed air systems and light towers from Atlas Copco
- Heavy duty and rough terrain forklifts: Hyster, Manitou, Utilev; Cushman utility vehicles
- Pumps from MWI
- Equipment packages for classified areas or hazardous environmental operation
- Marine propulsion systems, marine generators and electronic controls
- Agriculture pumps and power units
- Oilfield pump packages, pump drivers and natural gas power packs
- Torque converters
- Rail King railcar movers
- Freightliner trucks

RENTAL EQUIPMENT

We offer rental equipment for a broad range of customers who require power generation units, industrial and portable air compressors, material handling equipment and Rail King railcar movers. We provide accessory products, such as cables, hoses, fuel cells, air dryers, air compressor boosters and ground heaters.

Rental equipment is available for short-term use and can be contracted for long-term rental by businesses in a variety of markets. Turnkey rental service, provided by dedicated technicians, includes delivery, set-up, fueling, maintenance and teardown. Stewart & Stevenson's rental technicians are available 24 hours a day, seven days a week to provide service support. Each truck in our service fleet is equipped with all parts and supplies necessary to provide onsite maintenance and repair of our rental equipment.

Products

- Generators
- Compressed air equipment
- Forklifts
- Rail King railcar movers
- Light towers

A FULL SERVICE PROVIDER

Stewart & Stevenson provides aftermarket support to all customers of our manufactured, distributed and rental equipment.

- 24/7 service and maintenance by certified technicians
- Warranty service and repair
- OEM parts
- Refurbishing and retrofitting
- Equipment commissioning and servicing
- Operator training

TRAINING

Stewart & Stevenson provides technical, business and essential skills instruction at fully-equipped, ISO 9001 certified Training Centers located in Houston, Texas; Denver, Colorado; Piscataway, New Jersey; Tampa and Fort Lauderdale, Florida, and Bogota, Colombia. Classes are led by instructors who have been through extensive trainer qualification processes, including OEM product certification.

Technical training, an integral part of Stewart & Stevenson's aftermarket customer support, is provided on our OEM partner products as well as on our manufactured equipment. Upon request, we provide custom training to meet specific requirements and we offer on-site training at client locations around the globe.

Wherever our well stimulation, coiled tubing and power generation equipment, rigs and Rail King rail car movers are put into service, Stewart & Stevenson's certified technicians and trainers will travel there to provide commissioning and aftermarket support. Commissioning includes equipment installation oversight, initial service, inspection, testing and operator training. Our goal is to ensure equipment is properly installed, fully serviced and fully operational. Customer personnel are actively engaged in the training, assuring greater skill and knowledge upon completion.

Training, provided by Stewart & Stevenson Training Centers, results in employees with enhanced skills that are key to greater productivity and success in today's business climate.
